

VAIBHAV BHARDWAJ

SOFTWARE ENGINEERING | AI & AUTOMATION | DEVOPS

New Delhi, India | +91 8368801490 | vaibhvbhardwj@gmail.com
vaibhvbhardwaj.online | github.com/vaibhvbhardwj | linkedin.com/in/vaughv

SUMMARY

Computer Science graduate with hands-on experience in AI applications, full-stack development, cloud infrastructure and technical operations. DevOps Trainee at Comviva (Tech Mahindra), working with monitoring, troubleshooting, Oracle SQL, Linux and server fundamentals, with Docker exposure. Builds AI and automation solutions using Python, RAG, LLMs, Spring Boot, React and n8n; also brings product optimization, delivery and business-facing experience.

PROFESSIONAL EXPERIENCE

Comviva (Tech Mahindra) — DevOps Trainee / 17 Aug 2026 – Present

- Support monitoring and troubleshooting in server and infrastructure environments; work with Linux, Oracle SQL and server fundamentals.
- Gain practical exposure to Docker and container-based workflows; Kubernetes is a planned learning area, not yet claimed as hands-on experience.

Virtual Internships & Training / 2024 – 2026

- IBM SkillsBuild with BharatCares — Generative AI & Cloud Computing learning path; completed July 2026, including course credentials and digital badges.
- IBM SkillsBuild Generative AI program — remote boot camp (23 Feb–8 Mar 2026), with a preceding mandatory assignment period (24 Nov 2025–30 Jan 2026); focus on prompt-to-production concepts.
- Infosys Internship 6.0, Batch 8/9/10 — Project Intern (24 Nov 2025–30 Jan 2026); worked on ParkEase, a smart parking availability and reservation system.
- The Developer Arena — Project Intern (Jul 2025–Jan 2026); portfolio reports development of 14 full-stack applications, bridging React and Spring Boot.
- IBM–CSRBOX — AI Developer virtual internship (Jul–Aug 2025), contributing to a socially impactful AI agent.
- Coding Ninjas platform clone project internship (Jun–Aug 2025); React, Vite and Tailwind CSS.
- IBM–CSRBOX — Frontend Developer virtual internship (Jun–Aug 2024), developing a web application aligned with a UN Sustainable Development Goal.

AI & SOFTWARE PROJECTS

LifeOS — Offline-First Household Command Center

Mobile App Development / Local-First Architecture / Privacy-Focused Systems

- Developed a privacy-focused household management application concept centered on offline-first access, local data ownership and reduced dependence on cloud infrastructure.
- Designed the product around local data storage and reliable access to household information without requiring continuous internet connectivity.
- Explored local-first system architecture, synchronization requirements and the trade-offs between offline availability and cross-device data consistency.
- Planned a mobile companion experience to make household information accessible across devices.

AI Job Scraping & Scoring Agent

Python, FastAPI, Playwright, Ollama, SQLite, BeautifulSoup

- Built a local-first AI job discovery and scoring system that aggregates opportunities from multiple platforms and evaluates relevance against candidate profiles.
- Developed modular scraping workflows, browser automation, duplicate detection and API-based orchestration.
- Integrated locally hosted LLMs through Ollama to support automated job matching and scoring.

Swasthya Sathi — Healthcare AI Platform

Amazon Bedrock, Claude, Node.js, DynamoDB, AWS

- Developed an AI-assisted healthcare platform featuring patient support, lab-report analysis, consultation workflows and medication tracking.
- Integrated Claude through Amazon Bedrock to explain abnormal lab metrics in accessible language.
- Implemented authentication and patient-management workflows with human review incorporated into medical communication.

AI Research Assistant

Python, Google ADK, Gemini, RAG, Google Cloud Run

- Built a retrieval-augmented research assistant using Gemini, Google ADK and Wikipedia retrieval for context-grounded question answering.
- Developed custom retrieval tools and an HTTP API, and deployed the application on Google Cloud Run.

ParkEase — Smart Parking Management System

React, Node.js, Express, MongoDB, JWT

- Developed a smart parking application with role-based authentication, parking reservations, user and admin dashboards, booking history and pricing logic as part of an internship project.

INDEPENDENT PRODUCT & WEB DEVELOPMENT

Experimental Product Development / Sep 2025 – Present

- Explore product development from requirements and technical planning through implementation, optimization and delivery using Spring Boot, React, MERN and n8n.
- Contribute to product planning and business-facing work, including sales and marketing. Ventfly is currently inactive and retained as a research/development effort.
- Selected portfolio work: NGPS Multitech and Bhardwaj Marble Trading Co. (live business websites); TFF and Palassio (in-progress directions); Kronus, TS Worldwide Express, VedaTouch Therapies and Mohan Kamboj Dhaba & Hotels (web projects).

EDUCATION

B.Tech, Computer Science & Engineering — GGSIPU / Graduated May 2026

B. M. Institute of Engineering and Technology | CGPA: 8.0/10

CERTIFICATIONS & DIGITAL BADGES

IBM SkillsBuild: Getting Started with Generative AI; Foundations in Generative AI; Introduction to Large Language Models; Ethical Considerations for Generative AI; Generative AI Digital Badge. Additional portfolio badges/credentials list issuers including Google & Kaggle, Google Cloud, AWS Academy, Infosys, IBM, Tech Mahindra, NextWave, TATA and UXccelerate; add exact credential titles and credential URLs selectively.

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, JavaScript, SQL

Mobile & App Development: React Native, Android Studio, Mobile UI Development, Offline-First Application Design

Frontend Development: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend Development: Java, Spring Boot, Spring Security, Node.js, Express.js, FastAPI, REST APIs

AI & Generative AI: Generative AI, Retrieval-Augmented Generation (RAG), AI Agents, Prompt Engineering, Gemini, Amazon Bedrock, Ollama, Google ADK

Databases & Storage: PostgreSQL, Oracle SQL, MongoDB, DynamoDB, SQLite, Local Data Storage

Cloud & DevOps: AWS, Google Cloud, Linux, Docker, Server Monitoring, Troubleshooting, Kubernetes (Learning)

Automation & Tools: n8n, Playwright, BeautifulSoup, Git, GitHub, Postman

Engineering Concepts: Offline-First Architecture, Local-First Systems, Authentication, API Integration, Workflow Automation, Product Optimization

Business & Product: Product Development, Market Research, Business Development, Sales & Marketing, Customer Requirements Analysis, Product Strategy, Website Delivery
